Strong black is a metaphor for events that are surprising and very rare to observe, and because no one normally expects them to happen, in justifying the causes and consequences of these phenomena, there are usually times of disagreement and conflicts between intellectuals and rationalists. It may take decades and centuries not to get results. The name of this phenomenon is rooted in the Western culture, which considered the white strong as a symbol of purity, and since most people had not seen the black strong, they considered its existence as a manifestation of the devil and a symbol of evil and witchcraft. This ancient myth is so rooted in the belief of the people of the West that it has also inspired musicians and writers in the Swan Lake ballet (by Pyotr Ilyich Tchaikovsky). In this ballet, which was staged in 1877 at the Bolshoi Theater in Moscow, the Black Widow is a sorceress who tries to trick Prince Siegfried.
